

Meet Jane

- Suffering from headache
- Does not have time for long doctor's wait room times
- Overwhelmed by information on the Internet

AI Chatbot: Personalizing Digital Health Advice

Harleen, Max, Hanxi, Navraj

Agenda

- Problem Statement
- Proposed Solution
- Benefits
- Data Sources
- Implementation
- Measuring Impact
- Business Case
- Competitive Analysis
- Ethical Considerations
- Future Research
- Q&A

Example

- In 2013, over **50%** of Canadians **used Google for self-diagnosis**, while in 2020, **69% searched online** for health information, and **25% used online resources** for health tracking.
 - A significant percentage of American adults, between **67.5% and 81.5%**, **search for health-related information** online during these years.
- 

The Problem

Increasing reliance on online health advice causing more harm than good.

- **Trustworthiness issues** in AI chatbots providing health advice
 - **Inaccurate self-diagnosis** based on online information leading to **anxiety** and potentially **harmful decisions**
 - Survey results: **43%** Americans **misdiagnosed themselves** after researching symptoms online
 - **74%** reported that the results **increased their worry**
- 

Our Solution: Meddi

An AI chatbot that refrains from generalized and unspecified diagnosis

- The chatbot engages in a conversational manner, asking about symptom severity and related signs for more accurate results.
- Accepts and responds to bimodal input (text, and images)
- It provides multiple potential diagnoses with corresponding severity and likelihood indicators.

Meddi Demo

Meddi

Your Health advice
made simple

Get started

Hi Jennie, tell me about
how you are feeling.

I have headache for a couple
of days now.

That sucks. Tell me more
about it.

- Where do you feel the
pain?
- How much does it hurt
on a scale from 1 -10?

I feel it at the sides of my
head near my temples, and
I'd give the pain about 4.

Based on the information
provided this is my
analysis:

Normal Headache
Likelihood: 89%

Hi Jennie, tell me about
how you are feeling.

I got this really itchy
rash on my back
recently here is a
picture

Based on the image
provided this is my
analysis:

Poison Ivy Contact

Let me know if you would
like to know more about
remedies for this problem

Meddi Benefits

Chatbot will be online
24/7

**24/7
Availability**

**Easily
Accessible**

Built with Microsoft
Azure services

Strict privacy protocols
to ensure maximum
confidentiality

**Ensures
Privacy**

Well-rounded

In most areas
regarding healthcare
through thousands of
databases.

Risk of Misdiagnosis

- Overconfidence in self-diagnosis, leading to disbelief in professional opinions.
 - Unnecessary panic due to inaccurate worst-case scenario assumptions.
 - Requesting unnecessary tests, wasting time and money.
 - Reliance on unreliable sources with misleading information.
- 

Data Sources

- Symptom Databases (National Library of Medicine)
 - Drug Databases (Kaggle)
 - Public Health Databases (PubMed)
 - Medical Research Papers
 - Healthcare Surveys and Questionnaires (Statistic Canada)
- 

Implementation (Data Processing)

Data collection: refers to the systematic collection of relevant patient information, medical data and other healthcare-related data from a variety of sources

Text/Voice

Image

Implementation (Training Model)

Technologies and Services:

- Azure Computer Vision
- Azure Language Understanding Intelligent Service (LUIS)
- Text Analytics (Sentiment Analysis, Key Phrase Extraction)
- Azure Machine Learning

Models:

- Image classification model
- Regression Model

Testing:

- Holdout Method

Implementation (Deploying & Monitoring)

1. Create user-friendly interface (website)
2. Add AI interface to it
3. Publish public website
4. Maintain Site
5. Anonymously use data from users to retrain model

Measuring Impact

Positive Impacts on Society:

- Bridges healthcare accessibility gaps
- More personalized healthcare solutions
- Contribute to early disease detection
- Promote health awareness and education

Measuring Impact:

- User satisfaction surveys
- Tracking patient outcomes
- Measuring healthcare system changes

Measuring Impact

Mitigating Negative Impacts:

- Following ethical and privacy guidelines
- Develop with diverse datasets
- Regular monitoring and updates
- Implement strong security measures
- Adopt sustainable technology practices

Cost Calculation

Business Case

Meddi Pal (Health Journal):

- Target: Health Enthusiasts
- Logs user data to improve accuracy
- Connects to third party api (My Fitness Pal, Apple Health etc.)
- Prompts user to update their health and wellness regularly

Cost: \$10/Month

Meddi Pro (Enterprise):

- Target: Doctors, Nutritionists, Coaches
- Allows professionals to manage multiple accounts and track their health progress
- Users can choose what data to share

Cost: TBD

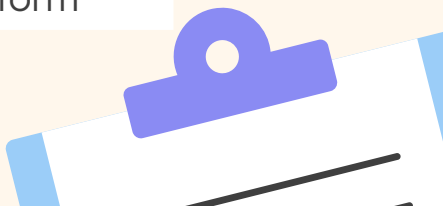

Competitive Analysis

Current Solutions	Limitations	Meddi
Google Search	Generalized insights	Responses tailored to individuals inputs
	Advertisements	No Advertisements
Chat GPT	Risk of hallucinations	Doesn't use transformer model
	Not specialized for healthcare	Made solely for health queries
Med-PaLM	Has a bias in data	Trained with a variety of data sets to reduce bias
	No platform	Web and app platform

Ethical Considerations

- Maintain user anonymity
- Have strict confidentiality protocols
- Require explicit user consent
- Provide disclaimers for services
- Regular audits & Human oversight

Future Research

- Enhance prediction accuracy through research
- Study chatbot impact on patient confidence
- Invest in advanced NLP techniques for personalized, human-like responses
- Develop AI-specific healthcare legal and regulatory frameworks, ensuring ethical deployment and data privacy

Thank You!
